ABSTRACTS

Values are standards, rules, criteria, attitude, dispositions or guideline which plays a crucial role in shaping the life of individuals. Values influence our emotions, feelings, behavior and activities which give meaning to our life. Value is a part of Sanskrit language because it is one of the most respectable and ancient language. Language is also a great treasure house of good value through stories and epics, like Ramayana, Bhagwat Geeta, etc. In Today's scenario everything have been changed like education, now general education not fulfill the professional aspect of human so everyone want to learn professional course and professional values. Value is very important part of any one profession because it gives the good platform to handle problems and new challenges in professional life. Professional education includes any programs that improve the knowledge, skills, attitudes, or behaviors. Professional education refers to skill and knowledge attained for personal development and career development. A proper value system must be inculcated by educational institutions though educational process based on rationally, scientific and moral approach to life. Hence a need of value oriented education for students and teachers in every field of profession. In this paper the researcher include to profession like Teacher education, Medical Education and Law Education because they are more valuable profession in India.

INTRODUCTION

*We wish that teachers begin to teach
Students begin to learn,
And
Parents begin to accept
this can take concrete shape?*

Values education can show which morals are "bad" morals and which are "good".

Today the word "value" has thus become a common parlance. But what indeed are these values that we wax so eloquently about? Values are guiding principle that shapes our conduct and behavior. System of values signifies a moral code of conduct; it is in effect a 'SHASTRA' that delineates how we should respond to certain stimuli and situations. Value dictates human behavior..... it is dynamic term involving ideal modes of conduct that shape one's vision of life. Values are "culturally defined as desirable and lay down contour of our social behavior.

'Dictionary of social science 1999'

Values are standards, rules, criteria, attitude, dispositions or guideline which plays a crucial role in shaping the life of individuals. Value influences our emotions, feelings, behaviour and activities give meaning to our life. In fact values will be parts and pieces of realization and vision where we can explain our identity and put ourselves in the right place at the right moment. The purpose of promoting values in professional education is to fight obscurantism, religious, fanitism, violence and to promote and nature critical thinking. In this critical situation Reasoning and building up a human approach to life it is important to know what are the teaching strategies to promote values in professional education. Because values followed by the teachers to discuss about a problem involving value conflict such as small family norm. In this way teacher cannot put values but can create an atmosphere for the students which will help them to explore values.

Value Education

Values education can take place at home, as well as in schools, colleges, universities, jails and voluntary youth organisations. There are two main approaches to values education, some see it as inculcating or transmitting a set of values which often come from societal or religious rules or cultural ethics while others see it as a type of Socratic dialogue where people are gradually brought to their own realisation of what is good behavior for themselves and their community.

Value education means inculcating in the children a sense of humanities, a deep concern for the wellbeing of other and the nation. This can be accomplished only when we instil in the children a deep feeling of commitment to values which would build order, security and assured progress. Value education has the capacity to transform a diseased mind into a very young, fresh, innocent, healthy and attentive mind. Transformed mind is capable of higher sensitivity and a heightened level of perception. This leads fulfillment of the evolutionary role in human life.

Professional Education

Professional education includes any programs that improve the knowledge, skills, attitudes, or behaviours. Professional education refers to skill and knowledge attained for personal development and career development. The term also describes the standards of education and training that prepare members of professions with the particular knowledge and skill necessary to perform the role of that profession. In one word we can describe the professional education as an expert who is a master in a specific type of profession called professional education.

Value in Professional Education

Educational institute are the place to prepare the future citizen. A proper value system must be inculcated by educational institutions though educational process based on rationally, scientific and moral approach to life. Hence a need of value oriented education students and teachers. A teacher easily inculcates values if he/she has professionalism and love towards his profession and students. Students directly benefit from educators who are actively involved in professional associations. Businesses

and communities ultimately benefit when highly trained students assume their roles as productive citizens and

employees. Businesses with access to a well developed workforce are more competitive in the global marketplace.

Professional associations assist educators in responding to environmental trends. Thus, we believe that students,

businesses, and communities profit when educators actively participate in professional associations.

Value in Medical Education

In India, medical profession is a very respectable profession. A medical teacher and students are meet new faces every day with sympathy, feelings, love and emotions etc. They have value of professionalism for his/her profession. Here some good points of value for medical teachers/students.

Professional value for medical teachers/students

- (a) *The professional behavior expected of medical students/teachers.*
- (b) *The scope of students/teacher fitness to practice.*
- (c) *The threshold of students/teachers fitness to practice and Making good decisions.*

Value in Law Education

A good lawyer must have insight into information about the institutions and values which concern the public at large, since it is the lawyer who is a force in shaping such institutions. Such insight comes from intensive study to a substantive depth in selected area, rather than from attempts to skill all the large area. Beyond extra community service because the law school want their students/teachers to have sensitivity towards the needs of society.

Value in Teacher Education

Teacher is a national builder. So, it is important to give the good quality and value based education to the teacher in teacher education. According to V. S. Mathews “ **No system of education, No syllabus, No methodology, No text book can rise above the level of its teachers. If a country wants to have quality education it must have quality teachers**”. So, it is necessary to give importance for values in the teacher education and also to take care in the framing of teacher education curriculum. It is necessary to provide all type of labs and library facilities to improve the value and quality education in teacher education.

CONCLUSION

According to author values are more important part of human life Because values are preparing good student, good human and best nationalize for present and further time. Educational institute are the place to prepare the future citizen. A proper value system must be inculcated by educational institutions though educational process based on rationally, scientific and moral approach to life. So, here author saying value oriented education is need to students and teachers in every filed of professional education.
